I am an RN working in CVR. Caring for fresh post op heart and vascular surgical pts. I have been out of the field for some years and needed a good reference book. THIS IS IT! This book is a smaller paperback which I like. It covers all cv surgical procedures and po op care. The charts and graphs are very helpful. I keep this book in m tote bag and pull it out when at work. Great for quick reference or late night study. A must have for any cardiovascular surgical nurse. Can't be more pleased with this purchase. Well worth the money!

I read this before starting my cardiothoracic fellowship and it prepared me for the specialized cardiac ICU management. Excellent resource. As an attending, I am now using the book to help launch a CVICU nursing continuing education program. Highly recommend this to residents, fellows, PAs, NPs, and CVICU nurses.

I read this book cover to cover as a study tool for the CSC exam. Passed! Highly recommend!

AMAZING BOOK. The must read for cardiac surgery care. I can't say enough great things about the layout, how each section is appropriately organized and you get the info you need, nothing padded.

Great read for my position in a busy CVICU. Information is presented in an easy to understand and logical manner. Would recommend to any nurse or resident looking to get ahead of the critical care learning curve. Will be in my work bag for a long time!

All of my nurse friends and resident MDs at the cardiac surgery ICU where I work have a copy. It's like our bible on a way. A little technical at first but really great for baby CTICU nurses.

The matter is that if you're a cardiology fellow, perioperative cardiac care fellow or a cardiologist; Bojar's is THE authority in the field. You must have this book in your library... or better... bedside
