Pat Marcuson, a fisheries scientist who specializes in alpine lakes, spent ten years surveying and sampling the lakes of the Absaroka-Beartooth Wilderness and the Crazy Mountains for Montana Fish, Wildlife & Parks. --This text refers to an alternate Paperback edition.

This book has an amazing amount of detail on the many lakes in this area. Could have a little more on how to get there, camping conditions etc. Also really needs an update with Lat/Long GPS locations in addition to Township/Range. I have the 2008 edition. Overall well worth the price if you

want to explore the fishing in this area.

Was a little more used than I expected.

Good guide to all the lakes in the Beartooth Mountains. Ever wonder if all those lakes have fish in them. This book tells you. Tells you depths and last time they were stocked and other useful information.

I have been going to the Beartooth Mountains for many, many years with my father and brothers. Even though there are many other places to camp and fish that are closer to home, the Beartooths are like a 2nd home to us and a great tradition for our family. This book is by far the best guide to this beautiful region.

Grew up in Montana with the first edition, and purchased the second edition so I can read up on some of the changes in the past several years. Planning a fishing trip back out that way, and this book and the Montana FW&P website is a must!

Well written by a guy who spent his time gathering the data. Found it very useful not only for the fishing info but for the camping and hiking info as well.

If you ever been in the beartooths or planning on going in the near future this book is a must. This book covers almost ever lake in the wilderness area with great detailed.

if you ever have been into this wilderness area or are planning this book is a must. It covers most of the lakes with detailed description.
