Introduction To Geography: People, Places & Environment (6th Edition)

Synopsis

Introduction to Geography: People, Places, & Environment, Sixth Edition introduces the major tools, techniques, and methodological approaches of the discipline through new applied visual features that engage students and reinforce real-world connections. The authors emphasize the integration of various aspects of geographic processes and systems by discussing what happens in one set of geographic processes and how that affects others. For example, what happens in economic systems affects environmental conditions; what happens to climate affects political dynamics. The Sixth Edition has been tightly integrated with MasteringGeography®, Pearson's online homework, tutorial, and assessment product designed to improve results by helping students quickly master concepts. Note: You are purchasing a standalone product; My_Lab/Mastering does not come packaged with this content. If you would like to purchase both the physical text and My_Lab/Mastering search for ISBN-10: 0321843320 /ISBN-13: 9780321843326, Introduction to Geography: People, Places & Environment Plus MasteringGeography with eText -- Access Card Package. Customer Reviews

Carl T. Dahlman earned degrees in sociology, music, and urban affairs before receiving his Ph.D. in

geography from the University of Kentucky in 2001. He is the Director of the International Studies Program at Miami University, where his teaching focuses on political geography, migration and mobility, and globalization. His current research includes the role of European integration in the geopolitics of Southeastern Europe, and he has published a book on the subject, *Bosnia Remade: Ethnic Cleansing and Its Reversal* (Oxford University Press, with Gearóid Ó Tuathail). He is a co-author of Pearson's *Introduction to Contemporary Geography*, with James M. Rubenstein and William H. Renwick. He enjoys photography and hunting for fossils with his son. William H. Renwick earned a B.A. from Rhode Island College in 1973 and a Ph.D. in geography from Clark University in 1979. He has taught at the University of California, Los Angeles, and Rutgers University, and is currently Associate Professor of Geography at Miami University. A physical geographer with interests in geomorphology and environmental issues, his research focuses on impacts of land-use change on rivers and lakes, particularly in agricultural landscapes in the Midwest. He is a co-author of Pearson's *Introduction to Contemporary Geography*, with James M. Rubenstein and Carl T. Dahlman. When time permits, he studies these environments from the seat of a wooden canoeboat. He is a co-author of Pearson's *Introduction to Contemporary Geography*, with James M. Rubenstein and Carl T. Dahlman.

The book I received had pages falling out of it already, and made the book hard to read when I had to constantly keep track of pages that were missing. Renting from is a good idea because it helps save money, just be careful of the quality you get.

The textbook seems to be good, but my professor made us buy it, to never use it

Book arrived on time and looked ok but as soon as opened pages started falling out making it hard to use to study. Still usable but condition could be better.+

My order got canceled. I had to rent a kindle edition, which does not let me read the book on my laptop online or on the kindle app for Windows 10

It is great ideal for my geography class in this semester and it help me to do some of the homework assigned by my professor

The quality of the textbook is terrible, the cover was nearly ripped off and the spine of the book is all

ripped up.

The first time I opened the book, i saw some page are torned. When it's the time to return, do not fine me.

Great glossary in the back with verydetailed index pages on all topics. I like how this textbook gives a lot of references back to previously covered concepts. Although this can also be a negative if you are not following chapter to chapter
