Stage Lighting: The Technicians' Guide: An On-the-job Reference Tool With Online Video Resources - 2nd Edition

Synopsis

This practical guide covers all aspects of stage lighting equipment, special effects, lighting a performance space and lighting design. It is well illustrated with examples of equipment, diagrams, plans and technical data. It also features the work of current lighting designers. The associated video content shows the practical use of equipment and different lighting techniques and effects. It provides easy access to the content through the use of tabulated sections and keyword headings. The information in each chapter is presented at three levels which run visually throughout the guide enabling students to mix and match their own personal level of study or for practitioners to fast track through to the information they need on stage. This new and revised second edition brings the guide right up to date, and includes all new material on the development of LED lighting in recent years, as well as online video resources.

Customer Reviews

“Impressive, on-the-job reference tool ... Its user friendly, well-illustrated and tabulated formats gives it the potential to be a strong source of practical information for arts students of all levels. 5★ Teaching Drama on the first edition “This has to be one of the most comprehensive books on the subject of stage lighting that I have ever seen. It’s written for post 16 students who are studying stage lighting as well as entrants to higher education specialist courses, but it is also invaluable to the amateur theatre market... This is an absolute must for every amateur theatre group that lights their own productions.” Amdram on the 1st

edition – “I am sure it will become standard reading in theatre schools.”
Michael Goldberg, Sales & Marketing Director, Phillips Entertainment on the 1st
edition – “Well presented both in content and technical quality of the material”
Sightline: Journal of Association of British Theatre Technicians

A new and revised edition of the quick-reference guide to stage lighting, covering a wealth of detail on equipment, lighting a performance space, special effects and lighting design, including additional sections on LED lighting as well as video content.
