Customer Reviews

This book was a pleasure to review-excellent papers, professionally edited, and well-presented. The breadth of papers would suggest the greatest appeal would be to strategic planners and exploration directors within the minerals industry, who are considering various options for their corporate strategies…The volume certainly achieves its stated aim-of being a substantial tribute to the father of marine economic geology and the driving force behind the International Marine Minerals Society, the late Prof. J. Robert Moore.--Bob Foster, School of Ocean and Earth Science, University of Southampton, United Kingdom
