# Plumbing 301

## Synopsis

Designed for the third-year plumbing apprentice, Plumbing 301 uses a straightforward, clear writing style and the most current plumbing and gas code references to deliver the "need-to-know" information for both commercial and residential plumbers. Coverage begins with basic installation practices, and progresses to include blueprint reading, the National Fuel Gas Code, surveying instruments, and special chapters devoted to connections to the math and science of plumbing. Discussions of water heaters, water treatment, trench safety, and electrical controls and wiring have been added to round out the thorough coverage. With two chapters on preplanning and electrical controls, this book will give readers the tools they need to be successful as they continue their journey into the plumbing industry.

## Customer Reviews

Delmar Cengage Learning has given the PHCC Educational Foundation the partnership it needs to bring the best training publications to the plumbing and HVACR industry. Their professional staff has been with us every step of the way, providing the resources and support we need to create the products and market them to a national audience.- Merry Beth Hall, Director of Apprentice & Journeyman Training, PHCC Educational Foundation

The Plumbing-Heating-Cooling Contractors Association (PHCC) Educational Foundation was

founded in 1987 by a partnership of contractors, manufacturers, and wholesalers. Its mission is to provide workforce development, management education, and technical training to advance the growth and career success of those employed in the plumbing and HVACR industry.

Great set of textbooks on plumbing

This book is a more of a general book about residential construction. It is not focused on plumbing of a house. It is a good book to get a general knowledge about how a house is built, not much details about plumbing of a house.
