Customer Reviews

A friend gave us this CD after her own children had aged out of it, so we do not have the accompanying book, but we are using the CD in the car almost daily and it is great for helping your kids memorize their multiplication tables. The first few songs are about general multiplication principles, and then it runs through the multiplication tables from 1 to 12 in order, repeating each set twice. The kids sing along, and it has really helped, and is much more pleasant than flash cards. The songs run through my head incessantly too, so that's the downside, but these do the trick...

My daughter LOVED IT!!!! She listens to it all the time and it has helped her so much.
