MapArt Publishing is Canada's Most Trusted Map Provider.

This is a pocket-sized (6" by 4") atlas of Calgary. After the table of contents, there are two "macro" maps, one of Calgary and one of southern Alberta. Then follows about 80 pages of "micro" maps, each showing approximately two or three square kilometers. These micro maps have a high level of detail about roads and show the locations of some attractions, but not businesses. At the end is a long index, allowing you to look up a street or neighborhood and see the page number and map number where it appears in the atlas. If this sounds like what you need, by all means get it. It's well-laid out, the size is convenient, and the price is very reasonable. For my needs, it was too "micro," too much detail. I was vacationing in Calgary and Banff with my family, and ended up using the more "macro" maps in my other travel books - and on my smart phone. But that's my fault for not better understanding the nature of this product before I bought it. This is why I'm writing this review - so you'll know exactly what you're getting and can make a more informed decision about whether this is the right purchase for your needs.

This book is basically an atlas of Calgary and the surrounding area. I found the guide to be colorful, useful, and very informative. I hope one day to travel to Calgary where I would bring this atlas for

either walking or driving around the city. This atlas guide revealed the parks and sites of interest in traveling there among a large city. I have been interested in the city since 1988 when it hosted the Winter Olympic Games.

I love the CCC maps of Canadian cities. They are nicely presented and packed with information. The Calgary street atlas has good coverage, going well beyond the city boundaries to include Airdrie, Okotoks etc.
