1997 Uniform Building Code, Vol. 1: Administrative, Fire- And Life-Safety, And Field Inspection Provision

Synopsis

The Uniform Building Code is one of the most widely adopted model building codes in the world and is a proven document meeting the needs of government units charged with enforcement of building regulation. The most recent edition, published in 1997, provides complete regulations covering all major aspects of building design and construction relating to fire and life safety and structural safety. The provisions of the 1997 Uniform Building Code were published in three volumes to help building inspectors, plans examiners, architects and structural designers locate provisions applicable to their respective fields without the need to search through all provisions. The two most popular volumes, 1 and 2, are now available from Delmar Learning. Volume 1 contains the administrative, fire- and life-safety, and field inspection provisions, including all nonstructural provisions and those structural provisions necessary for field inspections.

ICC is a leading organization dedicated to developing a single set of comprehensive and coordinated national model construction codes. 48 states have adopted various International Codes from ICC.

OMG! OMG! OMG! This is the best book I've ever read. Seriously.

It's a code book.

I needed to order an out-dated code book, and found a great price on . The book was shipped the same day that I ordered it, and it was as described: new, still in plastic wrap.

The book was purchased in CD rom form. There is key word searches for specific items. Every builder needing a permit to start constuction should know this book well. Another company that puts out a similar book is called Boca. They supliment and overlap the UBC. Both are handy, but very over priced.

I FOUND SOME PROBLEM REGARDING UBC SEISMIC LOAD IN BUILDINGS'DESIGN TAKING TO ACOUNT 1994 UBC EDITION AND COMPARING THIS TWO WITH EACH OTHER MAKE CONFUSING THE REASONS ARE : 1- WHY THE SHEAR FACTOR HAS CHANGED THIS MUSH? IF YOU COMPARE UBC 1994 SEISMIC LOAD WITH 1997 IT CAN BE OBSERVED THAT FIGURS R,I ,.. HAVE SAME MEANINGS BUT CONCEPT OF SHEAR FACTOR CALCULATION IS TOTALLY REVAISED I WANT TO KNOW THE JUSTIFICATION FOR SUCH CHANGES 2-THE NEW FACTORS WHICH ARE CONSIDERED IN NEW FORMULA IS ANOTHER QUESTION ,WHY THE RESPECTIVE COMMITTEE RECENTLY HAS REALISED THAT THESE FACTOR ARE IMPOTANT AND VITAL IN CALCULATION OF SHEAR FORCES INDUSES BY EARTHQUACK.I WOULD LIKE TO SEE THE PAPERS OR EXPLANATIONS FROM SPECIALISTS ON THIS ISSUE 3-IS THERE ANY SIMILAR COMMENT ON THIS UBC FORMULA 4-IS THERE ANY AMENDMENT ON UBS SEISMIC LOAD(1997) WHICH HAS BEEN OFFICIALY APPROVED 5- IS THER ANY REVISION ON THE ABOVE MENTIONED UBC FORMULA (SEISMIC LOAD UBC 1997) RECENTLY ISSUED
