The Muhammad Code: How A Desert Prophet Brought You ISIS, Al Qaeda, And Boko Haram

Synopsis

Osama bin Laden called Muhammad "a Prophet of Conquest." Pakistan's Universal Sunnah Foundation brags that under Muhammad's battlefield leadership, "Islam spread an average of 317 square miles per day." Right now ISIS, al Qaeda, Boko Haram, and the Supreme Leader of Iran know that Islam toppled two of the biggest superpowers in history; Rome and Persia; then took over two-thirds of the inhabited world. Militant Muslims believe that Islam is on the brink of doing it again. The Muhammad Code: How a Desert Prophet Brought You ISIS, al Qaeda, and Boko Haram lays bare the origins of this profoundly dangerous belief. Many contemporary thinkers excuse Islamic violence as a legitimate reaction to Western imperialism. They blame America's wars in Iraq and Afghanistan and the establishment of Israel in 1948. But Jihad was invented in 624 AD by the only prophet ever to call himself "The Prophet of War." And that prophet was not responding to "legitimate grievances," but an ambition for world conquest.

Customer Reviews

"I'm racing through The Muhammad Code, like a formula one racer is pushing me along. I've always been a fan of Howard Bloom's writing. Brilliant. Forceful... and something everyone must read." -Michael Mendizza, co-author Always Awakening, Buddha's Realization--Krishnamurti's Insight "The Mohammed Code is keeping me up at night. It's a terrifying book-- like a horror novel. It's the best book I've read on Islam." -David Swindle, lifestyle editor, PJ Media "The most riveting thing to come down the Bloompike since The Lucifer Principle." -Dorion Sagan, author of Cosmic Apprentice and

co-author, Cracking the Aging Code" No other like it, you will never find another reading as insightful and up to date for our times." - Customer "What a great book. The Muhammad Code should be required reading for everyone. It's incredibly well researched. It's wonderfully written. It's one of the most important and brutally honest books in a very long time. We rarely get to see true disruption. The Muhammad Code is disruption." - Carl Gottlieb, former executive producer WUSA TV news, WUSA9, Washington DC CBS affiliate, former Deputy Director of The Project for Excellence in Journalism. "Truly a masterpiece. Thoroughly well written, packed with scholarly expertise. Required reading for anyone interested in the clash between Islam and The West." - Mads Br  gger, journalist and film maker (director of "The Ambassador"), Denmark "The Muhammad Code is wonderful. How does Bloom manage to assimilate so much sheer content--and to see so clearly and deeply into it? He writes with wit and generosity to those like Ayaan Hirsi Ali who have far more courage than I think I could muster in such circumstances. I have done my prodding and poking but The Muhammad Code is a major punch, and I hope those who make our decisions for us can be persuaded by it. Our world is safer with Howard Bloom in it." - Robin Fox, former director of research for the H. F. Guggenheim Foundation, Member of the National Academy of Sciences, founder of the Anthropology Department at Rutgers University, author of The Violent Imagination: The Search For Society "In the incendiary prose of historical truth, Howard Bloom defies the media eunuchs of dhimmitude and unveils the jackals of the jihad and the missiles in the minaret. A brave and ultimately lifesaving message delivered just in time." - George Gilder, author of Wealth and Poverty and; Knowledge and Power "A textbook which should be required reading in all Middle East studies, political science, and international relations courses. More thorough than anything I have ever read." - Tsvi Bisk, author of The Suicide of the Jews, Director of the Center for Strategic Futurist Thinking "I have read The Muhammad Code: How a Desert Prophet Gave You ISIS, al Qaeda, and Boko Haram--or How Muhammad Invented Jihad. It is excellent. realistic and profound. We must all be aware of these dangers. Bloom is absolutely right about his assessment. We are in for a long problem. I see no end in sight." - Don Beck, founder of Spiral Dynamics, author of Spiral Dynamics: Mastering Values, Leadership and Change "What a thoroughly researched and totally frightening read! Why is the world so blind to the Islamic terrorist threat? Why is the west so obsessed with having the followers of "The Prophet of War" like us? How can the west fail to comprehend the nature, scale and scope of the greatest threat to our civilization that has ever existed? I hope the President and his national security team have read this book. This is the best book I have read about the defining threat of our time." - Sam Ridley,

Harvard-educated independent investment banker, previously with Salomon Brothers and Morgan Stanley, and former senior executive with Polaroid and US WEST. "The Muhammad Code is keeping me up at night. It's a terrifying book like a horror novel. It's the best book I've read on Islam and the most elegantly written." David Swindle, PJ Media Quotes for The God Problem, another Howard Bloom title: "Enthralling. Astonishing. Written with the panache of the Great Blondin turning somersaults on the rope above Niagara. Profound, extraordinarily eclectic, and crazy. The most exciting cliffhanger of a book I can remember reading." James Burke, creator and host of seven BBC TV series, including Connections "Bloody hell...What a truly extraordinary book. I'm gob-smacked." Francis Pryor, President of the Council for British Archaeology, author, Britain BC "Truly awesome. Terrific." Dudley Herschbach, Harvard U, 1986 Nobel Prize in Chemistry "Deep, provocative, spectacularly well written...great." Robert Sapolsky, Stanford U, MacArthur Genius Award winner "Strong...like a STEAM ROLLER...impressive...great." Richard Foreman, founder Ontological-Hysteric Theater, MacArthur Genius Award-Winner "Mind-bending." Charles Siebert, contributing writer, New York Times Sunday Magazine "Ebullient, enthralling." Alex Wright, Director of User Experience and Product Research, New York Times, author, Glut: Mastering Information Through the Ages "A great book. I raced to finish it and enjoyed every page of the way. For those of us who do not invoke a god(s) to explain things, there is a challenge where did the complexity of the physical and natural world come from? How can we make sense of order without a blueprint or blueprint maker? This deep, provocative, spectacularly well written book provides some answers. It both preaches to the choir and provides a powerful tool for increasing the size of the choir. A wonderful book." Robert Sapolsky, Stanford U, MacArthur Genius Award winner, author, Why Zebras Don't Get Ulcers "I have just come out from the giddy ride through things of the mind and mathematics that is The God Problem. Bloom takes us on a magic carpet ride of ideas about: well, about everything. And it turns out that everything we knew about everything is probably wrong. Howard Bloom is the absolute master polymath and his book is an intellectual cave of wonders made more wonderful by the tales of the lives of the people behind the ideas. Don't start this book late at night, for it will banish sleep." Robin Fox, Rutgers University, author, The Tribal Imagination, former director of research for the H. F. Guggenheim Foundation "A must read for those wanting great literature delving into the greatest mysteries." Edgar Mitchell, sixth astronaut on the moon. "Terrific. I am stupefied by the amount of work Bloom has put in. Bloom is an authentic genius." Jean Paul Baquiast Institut d'Etudes Politiques de

Paris

“A profound and extraordinary look into the history of human thought.”

Yuri Ozhigov, Chair of Quantum Informatics, Moscow State University

Muhammad Code is keeping me up at night. It’s a terrifying book; like a horror novel. It’s the best book I’ve read on Islam; and the most elegantly written.

David Swindle, PJ Media

Quotes for The God Problem, another Howard Bloom title: “Enthralling. Astonishing. Written with the panache of the Great Blondin turning somersaults on the rope above Niagara. Profound, extraordinarily eclectic, and crazy. The most exciting cliffhanger of a book I can remember reading.”

James Burke, creator and host of seven BBC TV series, including Connections “Bloody hell...What a truly extraordinary book. I’m gob-smacked.”

Francis Pryor, President of the Council for British Archaeology, author, Britain BC “Truly awesome. Terrific.”

Dudley Herschbach, Harvard U, 1986 Nobel Prize in Chemistry “Deep, provocative, spectacularly well written...great.”

Robert Sapolsky, Stanford U, MacArthur Genius Award winner “Strong...like a STEAM ROLLER...impressive...great.”

Richard Foreman, founder Ontological-Hysteric Theater, MacArthur Genius Award-Winner “Mind-bending.”

Charles Siebert, contributing writer, New York Times Sunday Magazine “Ebullient, enthralling.”

Alex Wright, Director of User Experience and Product Research, New York Times, author, Glut: Mastering Information Through the Ages

A great book. I raced to finish it and enjoyed every page of the way. For those of us who do not invoke a god(s) to explain things, there is a challenge; where did the complexity of the physical and natural world come from? How can we make sense of order without a blueprint or blueprint maker? This deep, provocative, spectacularly well written book provides some answers. It both preaches to the choir and provides a powerful tool for increasing the size of the choir. A wonderful book.

Robert Sapolsky, Stanford U, MacArthur Genius Award winner, author, Why Zebras Don’t Get Ulcers

I have just come out from the giddy ride through things of the mind and mathematics that is The God Problem. Bloom takes us on a magic carpet ride of ideas about: well, about everything. And it turns out that everything we knew about everything is probably wrong. Howard Bloom is the absolute master polymath and his book is an intellectual cave of wonders made more wonderful by the tales of the lives of the people behind the ideas. Don’t start this book late at night, for it will banish sleep.”

Robin Fox, Rutgers University, author, The Tribal Imagination, former director of research for the H. F. Guggenheim Foundation

A must read for those wanting great literature delving into the greatest mysteries.

Edgar Mitchell, sixth astronaut on the moon.

Terrific. I am stupefied by the amount of work Bloom has put in. Bloom is an authentic genius.

Jean Paul Baquiast Institut d’Etudes Politiques de Paris

profound and extraordinary look into the history of human thought. — Yuri Ozhigov, Chair of Quantum Informatics, Moscow State University — “I’m racing through The Muhammad Code, like a Formula One racer is pushing me along. Brilliant. Forceful and something everyone must read.” — Michael Mendizza, co-author Always Awakening, Buddha’s Realization—Krishnamurti’s Insight (Howard Bloom)

You Are the Bulls Eye — the magazine of ISIS, the Islamic State — mentions — “dirty bombs in Manhattan.” — AP reports that, — “An al-Qaida leader has said 4 million Americans will have to be killed — as a prerequisite to any Islamic victory.” — Iran says it knows the 29 key weak points it can attack to wipe out — “Anglo-Saxon civilization.” — It — “s openly perfecting nuclear-ready missiles that will be capable of reaching Washington and New York as early as 2020. Pakistan has 130 — “Islamic bombs, — 130 nuclear warheads. It also has three long-range stealth submarines that could be equipped with nuclear missiles on a minute — notice, ocean-going submarines that could wipe out up to sixteen American cities. Our navy has enormous difficulty detecting these subs. And Pakistan is in danger of being taken over by its Muslim extremists. Meanwhile Boko Haram — leader Abubakar Shekau warns that he will kill you and sell your daughters as sex slaves in the marketplace. He — already done that with thousands of girls in Nigeria. ISIS explains that you are an enemy of Allah if you believe in democracy, freedom, rule of law, national independence, scientific thinking, secularism, the Constitution, gay rights, or human rights. And ISIS brags that its goal is — “terrorizing, massacring, and humiliating the enemies of Allah.” — That means you. How will that — “terror, massacre, and humiliation — against you be achieved? How does the life of Muhammad determine the answer? The Muhammad Code is the story of how a desert prophet set us up for the — “death cults — of ISIS, al Qaeda, and Boko Haram. It — the story of the only founder of a major religion ever to command 65 military campaigns and personally lead 27 of them. And the first to conquer 317 square miles of territory a day. It — the story of how that prophet set up your ancestors and mine for over 1,300 years of attack and enslavement, the story of how he laid the groundwork for the destruction of superpowers far more potent than the United States, and the story of how he started the longest-running world war in history. The Muhammad Code is the story of how that prophet demands that his never-ending war be turned against you and me.

This is a well researched book which shows a religion which is self- assured of its absolute authority and correctness. It is out not to be just another religion, but the dominant religion and absolute final authority in the pecking order of human affairs. The author does not suggest how that non believers should deal with this threat. But it does raise serious concerns about nuclear weapons falling into the hands of hard line Islamic terrorists. The book deals with how Islam has spread in the past and its ultimate goal of combined religion/ world government.

This book will change the way, not how you look at the world, but the way you, understand the world.

Hard to find a book on the "Prophet" Muhammad allot of books tend to gloss over the violent aspect of his life , this book gives you a very good insight into the violent start of Islam.

The two books you really need to tuck into these days are both by Howard Bloom; this one and The Lucifer Principle. This latest book is really an eye opening read. What you see groups like ISIS doing today - mass executions, destroying cultural icons, creating "terror" in Europe, etc, etc, is exactly what militant islam has been doing (well documented) for the last 1400+ years, because it works! TMC is the book to educate yourself on the mindset of the average jihadi, as well as understanding that the same book (s) used to radicalize the jihadi are the same used by every other muslim in the course of everyday life. There isn't a separate set of teachings for the jihadi. This book is heavy on footnotes, easily 60 pages worth, each one pointing to more sources of information from today going back centuries. Besides Dr Sebastian Gorka, Howard Bloom needs to be on your bookshelf if you are interested in furthering your education on just what is happening in the middle-east and Europe.

I want to say that the Muhammad Code provides the reader with insight of how we think, and react as a society of subconscious minds. There is a lot we can learn from The Desert Prophet , in addition to learning about his ability to manipulate his followers and terrify unbelievers (infidels) we can also learn how Muhammed gained strong leadership skills through his trials and errors. We the readers can learn just how powerful of a paradigm Muhammed created and how deeply his influence was planted into the subconscious minds of his followers even centuries after his passing. We could say that Muhammed's influence is a whole entire life form of its own, an intangible life force that knows no boundaries, seeking destruction, and dominance.

Am racing through The Muhammad Code, like a formula one racer is pushing me along. I've always been a fan of Howard Bloom's writing. Brilliant. Forceful and something everyone must read. Michael Mendizza, co-author Always Awakening, Buddha's Realization--Krishnamurti's Insight

My review was censored.

An interesting perspective worth knowing about, but I would nevertheless consider each case on its individual circumstances. Good recent information.
