# **TECFIDERA Capsule: Indicated For The Treatment Of Patients With Relapsing Forms Of Multiple Sclerosis**

## Synopsis

Although, your health condition may impact your everyday life, do not let it define who you are. TECFIDERA (dimethyl fumarate) capsule is used to treat relapsing forms (course of disease where symptoms flare up from time to time) of multiple sclerosis (MS; a condition in which the nerves do not function properly and people may experience weakness, numbness, loss of muscle coordination, and problems with vision, speech, and bladder control). Dimethyl fumarate is in a class of medications called Nrf2 activators. It may work by decreasing inflammation and preventing nerve damage that may cause symptoms of multiple sclerosis. This medicine is available only with your doctor's prescription. Thanks and may you have a good understanding about this drug. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!

## Book Information

File Size: 915 KB

Print Length: 30 pages

Publication Date: May 27, 2015

Sold by: Digital Services LLC

Language: English

ASIN: B00YF09IKO

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled
