Peterson Field Guide To Animal Tracks: Third Edition (Peterson Field Guides)

Synopsis

Roger Tory Peterson's unique identification system explains exactly what features to look for to tell one species from another. In each Peterson Field Guide, an author with expertise in the subject and an experienced artist work closely with the editors to ensure that both text and illustrations are accurate. This edition includes 100 color photographs of tracks and signs, more than 1,000 line drawings, and nomenclature for all the mammals of North America. The text includes descriptions of habits, habitats, tracks, signs, and ranges, and is filled with wonderful natural history stories. Olaus J. Murie, one of America's leading mammalogists, has completed fieldwork throughout the United States and Canada, from Labrador to the Aleutian Islands, with special concentration in the Northwest. He wrote *The Elk of North America* and many articles on natural history. Mark Elbroch is the author of several tracking guides, including two award-winning books, *Mammal Tracks and Sign: A Guide to North American Species* and, with Eleanor Marks, *Bird Tracks and Sign: A Guide to North American Species*. He has contributed to numerous North American research projects, from monitoring bears to capturing cougars to inventorying carnivores in dry tropical forests.

Customer Reviews

Dr. Mark Elbroch is author and coauthor of several guides to natural history. He is currently the Science Director of Panthera's Jaguar and Puma Programs. He earned his doctoral degree while leading cougar projects in Southern Chile and the United States. Roger Tory Peterson,

one of the world's greatest naturalists, received every major award for ornithology, natural science, and conservation as well as numerous honorary degrees, medals, and citations, including the Presidential Medal of Freedom. The Peterson Identification System has been called the greatest invention since binoculars. These editions include updated material by Michael O'Brien, Paul Lehman, Bill Thompson III, Michael DiGiorgio, Larry Rosche, and Jeffrey A. Gordon.

I have a small library of tracking and field books, and this is one of the best to take into the bush and also as a great guide to studying the language of the track. It is a must have. As far as tracking books go, Murie set the standard on tracking books. If I could only have two, this would be one of them--this and Paul Rezendes's Book: "Tracking And The Art of Seeing." .

A very informative book with great pictures.

Great product and service love it

Using this guide alot nice

The best guide to animal sign I've found.

Good guide to animal tracks. Lots of interesting information and good illustrations. My only complaint is the same I have for all animal track books that I have seen. There really are no pages for easily comparing different tracks. You have to flip back and forth between similar tracks. Other than that (which other books don't have either) this is a very good guide.

I really like how small the actual dimension of the book was. Content is great. Got this as a surprise stocking stuffer gift for my husband who loves the outdoors. Great little purchase with lots of information.

Not having a pack of wolves to observe . this book helped me to learn that wolves do and are the only canines that have only four toes. The book had that info plus a lot more it only makes me much more interested in others.
