Customer Reviews

Douglas Murphy MD, Associate Professor of Physical Medicine & Rehabilitation, Virginia Commonwealth University School of Medicine.

This book is great for anyone (instructor, resident, student, patient) with interest in learning more about amputation care and prosthetics. The book gives high yield information about the thought

processes and medical decision making that goes into caring for patients after amputation. The author-Dr. Murphy-is well versed in caring for amputee patients and has direct access to many of the most up to date prosthetic advancements.

It's a well written, concise book that provides good depth on each topic. Wish I had this when I was rotating through P&O clinics as a resident.
