Bundle: Introduction To General, Organic And Biochemistry, 11th + OWLv2, 4 Terms (24 Months) Printed Access Card

Synopsis

This bestselling text continues to lead the way with a strong focus on current issues, pedagogically rich framework, wide variety of medical and biological applications, visually dynamic art program, and exceptionally strong and varied end-of-chapter problems. Revised and updated throughout, the tenth edition now includes new biochemistry content, new Chemical Connections essays, new and revised problems, and more. Most end of chapter problems are now available in the OWL online learning system.

Book Information

Loose Leaf: 750 pages

Publisher: Cengage Learning; 11 edition (January 16, 2015)

Language: English

ISBN-10: 1305705157

ISBN-13: 978-1305705159

Product Dimensions: 1.5 x 8.2 x 10.8 inches

Shipping Weight: 4.2 pounds (View shipping rates and policies)

Customer Reviews

#BeUnstoppable with Introduction to General, Organic and Biochemistry + OWLv2! [View larger](#) [View larger](#) [View larger](#) [View larger](#) Problem-solving strategies To help you organize information to solve a problem, each chapter example includes a description of the strategy used to arrive at the solution. Chapter summaries prepare you for the exam At the end of each chapter, restated key questions are followed by summary paragraphs that highlight the concepts associated with the questions. Linking the chemistry to their real-world uses Essays describe applications of chemical concepts presented in the text, linking the chemistry to their real uses. In addition, application boxes cover diverse topics such as diseases, drugs, and biochemical pathways. Tying-It-Together & Challenge Problems gauge comprehension These problems build on material presented in earlier chapters, as well as test your knowledge of the material.

Your ticket to better chemistry grades OWLv2 is a proven system to help you succeed. Its Mastery Learning approach allows you to practice at your own pace, receive meaningful feedback and use learning resources to help you achieve better grades. Know what's important OWLv2 concentrates on what's most important—understanding chemistry concepts—and its technology lets you work the way that's best for you. Discover the relevance of your lessons Interactive simulations, visualizations, and tutorials integrated smoothly into your lessons. The more you learn, the better prepared you are to solve problems and analyze information—which helps you succeed in exams and in the workplace. Master the content Problems challenge you to think about the concepts, and OWLv2 lets you practice what you've learned.

Frederick Bettelheim was a distinguished university research professor at Adelphi University and a visiting scientist at the National Eye Institute. He co-authored seven editions of INTRODUCTION TO GENERAL, ORGANIC, AND BIOCHEMISTRY, ORGANIC CHEMISTRY, and several Laboratory Manuals. He is also the author of EXPERIMENTAL PHYSICAL CHEMISTRY and co-author of numerous monographs and research articles. Professor Bettelheim received his Ph.D. from the University of California, Davis. William H. Brown is emeritus professor of chemistry at Beloit College, where he was twice named Teacher of the Year. His teaching responsibilities include organic chemistry, advanced organic chemistry, and, more recently, special topics in pharmacology and drug synthesis. He received his Ph.D. from Columbia University under the direction of Gilbert Stork and did postdoctoral work at California Institute of Technology and the University of Arizona. Mary K. Campbell was Professor Emeritus of chemistry at Mount Holyoke College, where she taught biochemistry, general chemistry, and physical chemistry, as well as advised undergraduates working on biochemical research projects. Her avid interest in writing led to the publication of many highly successful editions of this textbook. Originally from Philadelphia, Dr. Campbell received her Ph.D. from Indiana University and completed postdoctoral work in biophysical chemistry at Johns Hopkins University. Her areas of interest included researching the physical chemistry of biomolecules, specifically, spectroscopic studies of protein-nucleic acid interactions. She was also coauthor with Shawn Farrell on BIOCHEMISTRY, 8th Edition (Cengage Learning), as well as several editions of GENERAL, ORGANIC, AND BIOCHEMISTRY by Bettelheim, Brown, Campbell, Farrell, and Torres. Shawn O. Farrell, a native of Northern California, received his B.S. in

biochemistry from University of California, Davis, studying carbohydrate metabolism. He completed his Ph.D. in biochemistry at Michigan State University, where he focused on the study of fatty acid metabolism. Dr. Farrell became interested in biochemistry while in college, as it was relevant to his passion for bicycle racing. He raced competitively for 15 years and now officiates bicycle races worldwide. He has taught biochemistry lecture and laboratory courses at Colorado State University for 16 years and now works for USCycling. Professor Farrell has written scientific journal articles about specific research projects and about laboratory teaching, as well as articles for sports publications, such as "Salmon, Trout, and Steelheader" magazine. He is co-author with Mary Campbell on BIOCHEMISTRY, 7e (Cengage Learning).Omar Torres received his undergraduate degree in Chemistry from Texas A&M University in 1998 and his graduate degree in Inorganic Chemistry from UCLA in 2001. He has experience in teaching, research (inorganic, organic, and analytical) and academic administration. Professor Torres taught both inorganic and organic chemistry at UCLA, where he earned two UCLA Department of Chemistry Awards for Excellence in Teaching for the 1998-1999 and 1999-2000 school years. In addition, Professor Torres has worked at the Dow Chemical Company (Freeport, TX) in the area of Analytical Quality Control, developing and implementing new technologies for various plant operators and analytical scientists. He is currently Dean of Science at the College of the Canyons.
