Soda Glazing (Ceramics Handbooks)

Synopsis

Soda glazing was, for many years, the neglected cousin of salt glazing. As pollution laws have become stricter, however, more potters have turned to soda and, to their delight, found not only the traditional orange peel surface but also a subtle palette of colors that have made them sit up and take notice. In this book Ruthanne Tudball discusses the history of and techniques involved in soda glazing. She includes body and slip recipes, kiln designs, and firing methods specifically developed for soda glazing. She illustrates her text with the work of an international group of artists.

Book Information

Series: Ceramics Handbooks

Paperback: 96 pages

Publisher: University of Pennsylvania Press (October 1, 1995)

Language: English

ISBN-10: 0812215710

ISBN-13: 978-0812215717

Product Dimensions: 9.2 x 6.2 x 0.4 inches

Shipping Weight: 9.4 ounces

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #1,350,330 in Books (See Top 100 in Books) #85 in [Books > Arts & Photography > Fashion > Models](#) #404 in [Books > Arts & Photography > Other Media > Ceramics](#) #626 in [Books > Crafts, Hobbies & Home > Crafts & Hobbies > Pottery & Ceramics](#)

Customer Reviews

Soda glazing was, for many years, the neglected cousin of salt glazing. However, as pollution laws have become stricter, more potters have turned to soda and, to their delight, found not only the traditional orange peel surface but also a subtle palette of colours which have made them sit up and take notice. In this book, Ruthanne Tudball discusses the history of and techniques involved in soda glazing. She includes body and slip recipes, kiln designs and firing methods specifically developed for soda glazing and she illustrates her text with the work of an international group of artists.

Ruthanne Tudball is a well-known potter, teacher, and lecturer. She is a fellow of the Craft Potters Association and is on the Craft Council List of Selected Makers. Her work appears in private and public collections in Europe as well as the United States.

Soda Glazing by Ruthanne Tudball is a must-have if you are a potter or clay artist considering the move to vapor glazing, or would like more information on the process, the kilns and the clays.

*Descriptive text about the soda glazing process *Clear and concise kiln diagrams *Profiles of potters' firing methods While this book assumes that you, as one who works with clay, have a rudimentary knowledge of the making and firing process, it does offer a range of basic to advanced information. After being entranced by an article about Ruthanne in Ceramics Monthly, I bought the book and literally read it cover to cover, several times. I was going through an "I hate to glaze" phase, and thought soda glazing was my answer. See my complete review at [...]
